

US CANADIAN CLEAR WATEK LLC

**FULLY AUTOMATIC BOTTLING EQUIPMENT
UNDER TECHNICAL COLLABORATION FROM**

**Compact Linear Bottling Machine For Carbonated And
Non-Carbonated Mineral Water And Liquids**

*CC 600 - Linear Semi Automatic
Rinser, Automatic Filler & Capper*

*CC 600
Linear Automatic Filler & Capper*

CC - 1000 (6 - 10) BPM LINEAR TYPE

US CANADIAN CLEAR WATEK LLC

CC - 600 / 6 - 10 BPM LINEAR

FULLY AUTOMATIC & SEMI AUTOMATIC

US Canadian Clear Watek LLC is one of the members of the Canadian Clear Group of Companies. Canadian Clear has incorporated the state of art technology in design engineering of the systems being manufactured. CC 600 fully automatic filling and capping and semi automatic rinsing is specially designed by US Canadian Clear Watek LLC for mineral water and carbonated beverages. The entire process has provisions in the machine for rinsing, filling, capping and sealing. The entire process is controlled by a PLC with Sensor Controls with one touch instrumentation system. The whole equipment is sleek and is capable of bottling ranging from 200 ml to 2 ltrs. The mineral water pet bottles / carbonated water bottles are fed into the Input Feed Conveyor of the CC 600 after manually rinsing them in the semi automatic rinser. The bottles go automatically on the conveyor to the filling stations. Optic Sensor senses the bottles and allows only required amount of bottles to enter the filling station. Special pneumatic robo's hold the bottles by the neck and body prior to the filling heads descending into the bottles. The filling is very accurate and is done by specially designed CC316 - 3way filling system. Filling system is incorporated alternatively for counter pressure as well as volumetric filling. The filled bottles then go to a cap pickup system where they pickup caps before being capped in the capping station. A special vibratory cap feeder provides proper orientation to the caps. The capped bottles are then sent out to the discharge conveyor.

Optional Features: Shrink Labeller is provided on the output conveyor.

Ozone Jets to disinfect caps.

Machine is designed either for carbonated or non-carbonated liquids

CC 600 MS/SS	6 - 10 BPM	Carbonated / Water
CC 600 SS	6 - 10 BPM	Carbonated / Water

Accessories : Compressor / Drier

Washing Heads 4 Nos

Filling Heads 4 Nos

Capping Head 1 No.

Feed Conveyor 0.5 HP

Capping Motor 0.5 HP

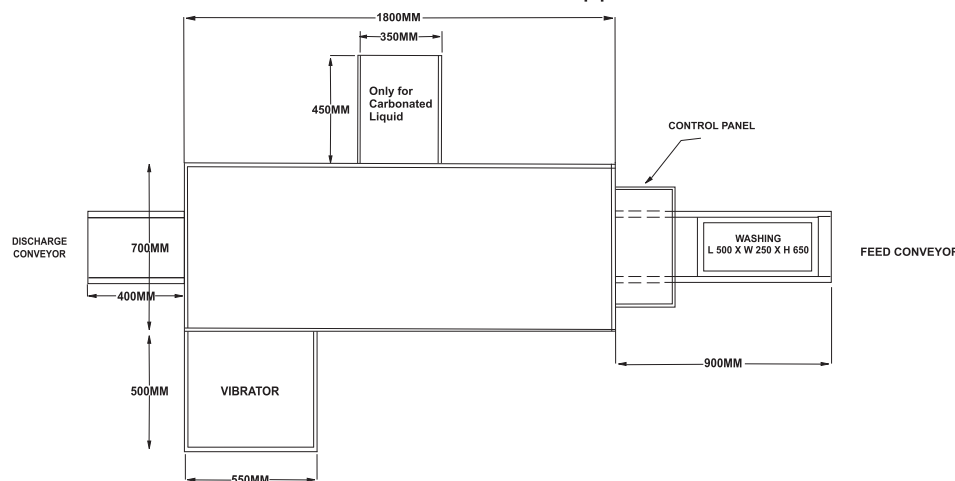

Washing Pump 0.5 HP

1.5 HP

Approx. Weight 500 KG

CC 600 LINEAR

Semi Auto Rinser & Auto Filler Capper
